TOLLING TRANSPONDERS

Precision, Performance, and Innovation
for Every Journey

ABOUT US

At QORE4, we are committed to delivering cutting-edge tolling products that set a new standard in performance, reliability, and efficiency. With our industry-leading RFID transponder technology, we provide a comprehensive portfolio of products designed to meet the needs of global tolling customers.

PERFORMANCE

Our transponders are built using the most advanced RFID technology, engineered for exceptional read accuracy and seamless integration into existing tolling infrastructures.

FUTURE

As tolling technology evolves, QORE4 is at the forefront, consistently innovating to meet the future needs of smart cities and transportation networks.

GLOBAL REACH

Our product range is designed to meet the rigorous demands of all 18000-63 toll installations, ensuring compatibility and performance across diverse systems worldwide

TOLLING TRANSPONDERS

HOV / HOT

Our 2 and 3-way switch transponders designed specifically for HOV/HOT lanes, offering a streamlined self-declaration process. Our product range includes options with and without an enforcement window, providing flexibility to cater to enforcement-based needs.

MOTORCYCLE

Easily affixed to your motorcycle headlamp, the motorcycle sticker tag features a tamper feature for enhanced security. Constructed with aluminum-based technology instead of silver ink, it reduces costs while offering robust performance in all conditions.

PORTABLE

Equipped with tolling technology and optional NFC for easy onboarding and user interface management. With alternative mounting capabilities, it offers mobility access and easy vehicle-to-vehicle transfer, perfect for families or rideshare. Designed with a low profile and reduced form factor, it ensures a clear driver view.

LICENSE PLATE

Our toll tags are engineered for efficiency, attaching seamlessly to the front license plate with minimal interference. An optional frame integrates a transponder, prioritizing security with tamper-resistant screws and a unique wrench for installation.

WINDSHIELD

Introducing our Windshield RFID Toll Transponder Stickers – choose Non-transferable for added security or Standard for seamless toll access. Constructed with aluminum-based technology instead of silver ink, it reduces costs while offering robust performance in all conditions. Rigorously tested, it guarantees consistent, superior performance.
